**DAVID BERNING COMPANY ANNOUNCES NEW PRODUCT
LAUNCH AT THE 2014 MUNICH HIGH END SHOW RM F131
MAY 15 – 18.**

CARLSBAD, CA May 9, 2014 — The David Berning Company, a world leader in advanced OTL tube electronics announces the debut of his 211/ 845 OTL amplifier.

The amplifier will automatically bias to 211 or 845 output tubes. No user adjustment is ever required. Output transformer less. 60 watts per channel. Class A Triode. Differentially balanced. Zero global feedback. Proprietary advanced switch mode power supplies with full Power Factor Correction for global plug and play operation. Constant output impedance over the entire audio spectrum utilizing the patented Berning ZOTL circuit. Drives difficult dynamic loads within its power rating while the inherently low noise floor accommodates high efficiency loudspeakers.

Stillpoints Ultra 5's, Ultra Bases and circuit board isolators are integrated for vibration control. Stillpoints cryogenic treatment is selectively utilized throughout the amplifier. Additionally, Stillpoints Aperture Room Treatments will be fully implemented in our Munich demonstrations.

PRICE 73,500 USD per monaural pair
